

ABSTRACT

A palletized tray system (10) is disclosed having a pallet (11) and a top piece (70) with a plurality of modular, stackable trays (40) disposed therebetween. The top piece (70) can be mated to a tray (40) or the pallet (11) positioned below the top piece (70); the
5 pallet (11) can be mated to a tray (40) or the top piece (70) positioned above the pallet (11); and, each tray (40) may be mated with another tray (40), the pallet (11) or the top piece (70).
